UConn Technology Incubation Program
presents

How to Create a Data Room

Featuring a presentation by
Ashley Kalinauskas
Entrepreneur-in-Residence, *UConn*

**BRING YOUR LUNCH* AND
GET READY TO LEARN!**

A well-organized data room can streamline the fundraising process, enhance investor confidence, and improve deal efficiency. Join TIP Entrepreneur-in-Residence, Ashley Kalinauskas, as she explains the critical role of data rooms in fundraising. Participants will explore how to set up a data room effectively, learn best practices for managing investor due diligence and discover what tools are best to use.

Kalinauskas is the founder and CEO of Torigen, a biotechnology company helping millions of dogs, cats, and horses after a cancer diagnosis. She has raised $25M in venture capital and along the way has grown the company from an idea on the scientific benchtop to a company of over 30 employees poised to help grow the animal health industry.

Please note that UConn TIP strives to foster a vibrant entrepreneurial ecosystem. As such, attendees are encouraged to participate in person whenever possible. A virtual option will be made available for those unable to attend one of the physical locations.

SAVE THE DATE

**Wednesday, April 9, 2025
11 a.m.-12 p.m.**

*Lunch will not be provided. Participants are welcome to bring their own refreshments.

Farmington Incubator
Rm. 1800
